ABOUT TECHS REPAIR

Techs Repair is a **consulting and operations firm** working with government clients across Washington State. We advise on programs, and we operate them. Our work sits at the intersection of the circular economy and community technology: electronics repair, reuse, and responsible recycling, paired with the program design, evaluation support, grant management, outreach, and training that make those programs work.

We are a certified minority-owned business with in-house multilingual capacity (English, Amharic, Tigrinya, Swahili, Somali, Kizigua/Zigula, and additional African languages through staff and partner organizations), serving communities that are too often invisible in program data.

CORE CAPABILITIES

- Electronics repair, refurbishment & reuse
- IT asset disposition (ITAD) & secure data destruction
- E-waste collection & responsible recycling
- Program design, implementation & evaluation support
- Grant writing & grant financial management
- Community engagement & outreach, in-language
- Digital literacy & workforce training
- Custom data systems & reporting (TRCM platform)

AREAS OF EXPERTISE

- Circular economy & waste prevention
- ITAD, data security & audit-ready disposal
- Digital inclusion for seniors, youth, refugee & immigrant communities
- Government contracting, invoicing & funder reporting
- Environmental measurement (EPA WARM v16 GHG analysis)
- Multilingual service delivery & culturally responsive outreach

WHAT SETS US APART

OMWBE-certified MBE: our self-performed work counts toward agency WMBE goals

We operate what we advise on: repair, reuse, and community programs we run ourselves

Executed MOUs: community organizations serving priority populations

In-language delivery: interpretation is in-house and partner-based, not subcontracted

Proven government track record: WA Dept. of Commerce, King County, and school district contracts

RELEVANT EXPERIENCE & PAST PERFORMANCE

CLIENT	ENGAGEMENT	PERIOD	OUR ROLE
WA Dept. of Commerce	Climate Commitment Act grant #24-92601-136, Electronics Reuse & Recycling Expansion	2024–present	Principal. Grant disbursements, eligible-cost tracking, financial reporting, community outreach, EPA WARM v16 GHG analysis (9.27 MTCO ₂ e documented)
